

Farm2Kitchen an open marketplace for Farmers and Producers offering Food Traceability on Blockchain

Healthy Food is the next trillion-dollar industry

64% of consumers said they look for healthier eating options. Consumer is curious to know where the food on their plate came from and if it was responsibly grown. Farm2Kitchen is providing that transparency using a Decentralized Global Platform enabled by Blockchain Technology. We are providing a marketplace for farmers and innovating the supply chain.

Our Solution

- Decentralized Blockchain Network**
Transparently trace the journey of food from the farm thru the complex supply chain to your plate.
- Mobile Apps for Producer, Transporter and Buyer**
Easy to use mobile interface tailored to serve the unique needs of all the parties in the eco system. No complex coding or integrations needed.
- Smart Online Farmers Market**
Global marketplace for farmers and producers to market their products.

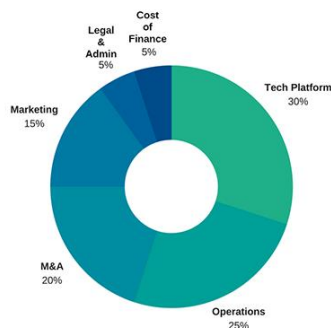

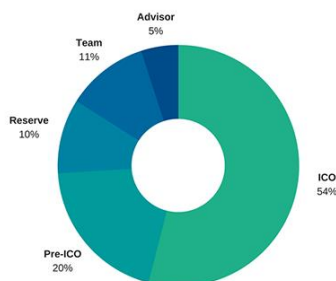

Why Food Traceability on Blockchain

Our Advantage

- Innovative solution to a global food safety and security issues identified by UN's World Food Program (WFP).
- Growing demand for fresh food and global awareness about food safety.
- Democratic, open-source, truly decentralized and trustless network build on Hyperledger Blockchain platform.
- Mobile apps for all users, which will drive mass adoption in the developing world, in-turn skyrocketing demand for Farm2Kitchen F2K tokens.
- Highly experienced team with a successful track record in the food industry.
